

A Closer look

Who we are

DXG Media are a leading commercial printer providing a diverse range of litho and digital print services to clients throughout the UK.

We have a varied client base, who require very different solutions. From quick digital print projects through to large run litho catalogues, from personalised mailers to bespoke folders.

Whatever the project, no matter how large or small we are committed to offering our clients a total print solution.

From day one we have maintained our vision to build a print business with an unrivalled reputation for quality and service, it is this passion that is instilled in all of our team and is why our clients continually come back.

The minute we receive your files on disc, email or via our ftp site, they begin a journey that sees them checked, colour managed, proofed, passed, plated, printed, finished and ultimately delivered. It's an efficient, award winning end to end process.

Litho

DXG Media understand how important your corporate literature is to you, that's why we place so much importance on getting it right.

It's not just about putting ink on paper - it's more important than that, It's about ensuring that your brand and corporate identity are protected. This means getting the quality, colours, specification, finish and delivery right.

Lithographic print from DXG provides unrivalled quality and can help you achieve your goals.

Litho Plant

- Heidelberg CD102 L+C, B1, 5 colour press

Related Services

- In-house finishing, storage and distribution
- 24 hour operation
- Dedicated Account Managers

Quality & Innovation

Quality

Everything we do is based on delivering the best possible quality print. Years of experience, skill and know-how count for a lot, we know this because our entire team has this in abundance. That means at every stage of the print process we look at things a little bit closer. It's this attention to detail that our reputation is built upon.

Print quality can often be overlooked in a fast paced environment. We do not rush, we do not panic and we definitely do not let our standards drop.

We would love to show you the amazing results we can achieve so contact us today and prepare to be dazzled.

Hybrid Screening

DXG has adopted Heidelberg's Hybrid Screening as part of our printing process. Hybrid Screening enhances the quality of pictures and screens by combining the best of conventional amplitude-modulated (AM) and frequency-modulated (FM) screening to give truly excellent results. It works by producing the highest possible definition and print quality.

Innovation

Central to the DXG ethos is a desire to innovate and improve. This encompasses our people, our technology and our systems.

We strive to work efficiently and never overcomplicate our processes with red tape and jargon.

We've invested millions of pounds over the years and continue to do so. The motivation behind this is simply to offer the most efficient, cost effective and high quality print solutions.

If you are looking for the latest print techniques, specialist finishes or something bespoke we have the technology to help turn your ideas into reality.

Environment

Environment

Never before has the environment been so important and as a commercial printer we believe we have a duty to protect and sustain the environment wherever possible.

Our commitment to minimising our environmental impact is not just a box ticking exercise.

- We are FSC and PEFC certified
- We use vegetable based inks
- * We have invested in the Eco Clean filtration system (allowing us to recycle 90% of our cleaning agent)
- * We have waste management and recycling systems in place throughout our facilities
- * We are committed to reducing our clients carbon footprint as well as our own
- * We have a formal environmental policy in place

FSC & PEFC

The Management and all who work at DXG are committed to good environment performance and the use of paper from sustainable resources.

We have also established and follow a rigorous chain of custody system, enabling the Forestry Stewardship Council (FSC) or Programme for the Endorsement of Forest Certification Schemes (PEFC) logos to be printed on material where our customers require it and where either or both of these apply.
